PROJECTS

Sahayak[Video]

📅 April'2020 - Current

📍 IvLabs [Link]

- A teleoperated differential-drive robot to deliver food packets and medicines to the COVID patients. Doctors can interact with patients from a safe distance using the onboard video conferencing system.
- Developed the first version of this robot in the difficult times of lockdown, just in a span of 10 days and deployed it at **All India Institute Of Medical Sciences (AIIMS), Nagpur**.

Reconfigurable Quadrupedal-Bipedal Snake Robots[Video]

📅 October'19 - November'20

📍 IvLabs

- Designed snake robots capable of re-configuring into quadruped and biped without re-arrangement of any modules.
- ReQuBiS is capable of achieving Best of All Worlds by overcoming the disadvantages and leveraging the advantages of individual mobility modes.
- This project was mentored by **Rohan Thakker, NASA-JPL, Caltech, USA**.

MULTI AGENT WIRELESS SENSOR NETWORK[Link]

📅 December'18 - April'19

📍 IvLabs

- Implemented a mesh network based on IEEE 802.15.4 to establish consensus in a swarm of robots.
- Established handshake using Atmega328p as well as TIVA TM4C123GXL launchpad.

LASER SECURITY SYSTEM[Link]

📅 June-July'18

📍 IvLabs

- Implemented a laser security system with push notifications capability and real-time monitoring.
- Designed the hardware using Arduino Uno and used ESP8266 for notifications and Raspberry Pi0 for IP camera. Implemented the firm ware using Arduino IDE and Raspbian.

HARMONIC MOTION ANALYZER

📅 March-April'18

📍 IvLabs

- MATLAB based program to analyze motion equation and parameters. Designed an algorithm for tracing path of a damped oscillator.
